About Us

Y.K. College is situated along the Indo-Myanmar Highway in Wangjing. It was established on 1972 purely on public initiative which was then known as 'Eastern Manipur College'. The college is one of the premiere co-educational institutions in this part of the area and has been awarded Grade B by NAAC in 2022 under the dynamic leadership of the college Principal, Dr. S. Giri Singh. The college offers under-graduate courses in both Arts and Science streams. Apart from the general course, the college also offers vocational courses and certificate courses in Automotives, and Information Technology. The college is committed to keeping up its pace of progress and development and wishes to stay committed to excellence in all its fields of endeavour.

Y.K. COLLEGE, WANGJING, MANIPUR (INDIA)**

In Association with
**DEPARTMENT OF ECONOMICS
Manipur University, Canchipur, Imphal**

About the Seminar

Economic development is the policies or activities that seek to improve the economic wellbeing and quality of life for community. Economic development can also be termed as the structural transformation of an economy by introducing updated technologies to increase labour productivity, employment, standard of living, reduce poverty and improve goods and services of the population.

Sustainable development is a way of understanding the world and a method for solving global problems. The term sustainable development means, the development that meets the needs of the present generation without excessive use or abuse of natural resources, so that it can be preserved for next generations. The concept of sustainability is a relatively new idea, the movement as a whole has roots in social justice, conservationism, internationalism and other past movement with rich histories.

“Brundtland Commission” defines sustainable development that meets the needs of the present without compromising the ability of future generation to meet their own needs.

The three aims of sustainable development are the ‘Economic’, which help to attain the balanced growth, ‘Environment’ to preserve the ecosystem and the ‘Society’, which will guarantee equal access to all resource to human beings.

The main objective of the seminar is to bring stability in our economy, social and environmental requirement which further leads to properly and availability of resources for present and upcoming generation and to achieve healthy environment where people address environmental, social and economic issues jointly and concurrently avoiding overutilization of resources. Sustainability includes environmental protection, a stable economic development, preservation of natural resources and social development and to protect the environment to make it a place for our survival. A two day National Seminar with multi-disciplinary approach on ‘Economic development and Sustainability in Manipur’ will be discussing with the following subtheme particularly in the context of Manipur will be focused.
